

HULL INSPECTION SERVICES LTD.

Inspection | Testing | Certification | Calibration

HULL INSPECTION SERVICES LTD is a world class inspection firm that provides a wide range of industrial and maritime / offshore inspection services. We are licensed by Governmental Agencies, for the inspection and certification of Boilers, Pressure Vessels/Process Equipment, Cranes and Lifting Equipment.

A Nigerian Company having competencies and delivering global solutions in the areas of Quality Assurance, Quality Control, Risk Management, Project Management and Marine / Offshore Facility Inspections.

Our Multi - disciplinary competence is buoyed by a Hi-tech work force suitably positioned to respond to the dynamics and challenges of global business and our clients have benefitted from our irrevocable commitment to personal services.

Our people constitute our greatest asset. Exposing them to latest trends and technologies through world class training is a deliberate corporate policy.

We are working locally with global thinking having a policy accent on networking with companies locally and internationally. This way, we achieve synergies to always remain relevant in the global competitive market.

We respond to the needs of our clients faster than imagined, by removing unnecessary bureaucracy. We provide our clients, both multinationals and small local businesses, a service delivery that exceeds their expectation.

OUR SERVICES

PLANT INSPECTION & CERTIFICATION

We are licensed by Government Agencies in Nigeria to inspect and certify cranes, lifting equipment, steam boilers and pressure vessels. We also carry out in-services, shut down and turn around inspection services on power plants, oil and gas process plants and industrial Process Plants.

MARINE/OFFSHORE FACILITY INSPECTION

Our innovation concept in Managing risk, "Safe Cover", enables us carry out an indepth assessment of the technical condition of ships and offshore assets, the way they are operated and maintained, therewith assisting such assets to continue safe and reliable operations.

Our team of qualified and experienced professionals from variegated background offer risk management solutions that cut across:

- Insurance & Banking
- Oil & Gas
- Marine/Offshore
- Manufacturing

CARGO INSPECTION

Presently we carry out inspection of General Cargo in all the Eastern Ports on behalf of Nigerian Ports Authority. On behalf of various clients and insurance companies, we carry out survey of liquid cargo and certify quantities onboard vessels and barges before and after bunkering in accordance with API recommended procedures.

NON DESTRUCTIVE TESTING

We have in-house personnel qualified to ASNT NDE level III, PCN III, CSWIP 32 and AWS CWI. With this, we are positioned to meet all your NDT needs in:

- Ultrasonic Testing
- Radiographic Testing
- Magnetic Particle Testing
- Liquid Penetrant Testing
- Computer Radiography
- Positive Material Identification
- Infra-red Thermography

QUALITY ASSURANCE/QUALITY CONTROL

We have trained and qualified personnel prepared to deliver services.

- Welding Procedure Qualification Testing
- Welder Qualification Testing
- Welding Inspection
- Pre-fabrication Checks and Factory Acceptance test
- Equipment and Material Expedition

TRAINING & CONSULTANCY

Our training is tailored towards achieving competency based on the requirements of BS-ISO 15513 for crane operations and planning of lifting operations and BS En473, ISO 9712 and SNT-TC-1A for non destructive testing personnel. We provided outside agency services and NDT level III services according to SNT-TC-1A.
